Software Release Note for 3.08

General

Product: GPUECP V/W
Software Product: GPUECP.exe
Software version number: 3.08
ABB part number: 803025-0308
SPR number:736
MDS number: 295
Date of Release: December 03,2001

Product Summary

Software/firmware breakdown structure for the product. It is presented as an indented BOM. This release note is for one of the components making up the software breakdown structure. An '*' indicates this component.

GPU2000R
        GPU2000R box, V/W configuration
                Main Board
                        #CPU Flash
                        DSP firmware
                        Monitor firmware
                Front Panel
                        MMI front panel firmware
                Communication Board
                        AUX-COM firmware (Standard INCOM)
                        - or -
                        AUX-MOD firmware (Modbus)
      *GPUECP, V/W configuration
      WinFPI
      OAT
      CurveGen

Note: * indicates the components covered by this release note.
    # indicates the component containing the top level release note, where all of the software components and their version numbers are matched together.

Software Release Note for 3.08

New Features and Changes to Existing Functions

New Features/Functionality Added

N/A

Features/Functionality Removed

N/A

Features/Functionality Modified

Fixed a date format displaying 19a1 instead of 2001(CR #394)
Added Battery Failure record to Operating Records. (CR# 99)

Issues Resolved

CR #394 Date format in Operation Records after setting a clock with GPUecp was 19a1 instead of 2001.

Hardware Supported by this Version

Category	Type Designation
Main Board	smt (surface mount technology)

Installation Notes and Restrictions

EPROM Installation or FLASH Download

Software and Firmware Configuration Supported by this Version

Category	Type Designation	Valid Version
Main board cpu	CPU Flash firmware	V3.30
Main board dsp	DSP firmware	V1.4
Main board bootup rom	Monitor firmware	V2.0
Front panel	MMI front panel firmware	V2.0
Communication card	AUX-COM firmware	V1.7
Configuration & Engineering Tools	WinFPI	V1.0, Build 7
Configuration & Engineering Tools	WaveWin	V8.4
Configuration & Engineering Tools	CurveGen	V1.0

Software Release Note for 3.08

Contents of this Version

Subsystems

E.g.:
Operating system: Win2000, Win 98, Win95, WinNT

Modules

File name and version number

History (SAR/CRs Retired)

Version 3.07 and earlier of GPUECP.exe
